

## ABSTRACT

A molding having an ink layer, wherein the molding is formed from an alicyclic structure-containing polymer, the ink layer is provided after a pattern on the surface of the molding, and the retention of the ink layer when a 1-cm<sup>2</sup> portion arbitrarily selected from the surface of the molding containing the patterned ink layer is subjected to a tape peeling adhesion test is at least 80%. A molding having an ink layer, wherein the molding is formed from an alicyclic structure-containing polymer, and the ink layer is provided after a pattern on the surface of the molding and has an index of wetting of at most 42 dyn/cm.
